

MAINTENANCE FILE

THE TABLE

THE CIRCLE

THE BOW

POINTS OF ATTENTION DURING USE

- Move the Table / Circle with at least 4 people.
- Lift the Table / Circle and don't drag it.
- Make sure all feet touch the ground at all times.
- Do not stand on top of The Table / Circle.
- Avoid contact of hard objects with the metal frame.
- Do not leave objects on the wooden surface for too long. The wood will not be able to breath and may stain.
- The wood will gradually darken when exposed to direct sunlight.
- Remove stains on the wood as soon as possible.
- The Table Large - maximum 12 people
- The Table Medium - maximum 10 people
- The Table Small - maximum 8 people
- The Circle - maximum 10 people
- The Bow - maximum 5 people

UNDERSTRUCTURE MAINTENANCE

PROPERTIES

- Structural parts: Metallised and powder-coated steel
- Fasteners: Stainless steel
- Leveling feet: Stainless steel + plastic

MAINTENANCE

- Clean the base with warm water.
- Use non-abrasive soap for stubborn stains.
- Do not use an abrasive sponge but a soft sponge or wipe.
- Clean off rust stains with cleaning vinegar.
- Minor damage can be touched up with a paint pen in the same RAL colour.

WOOD MAINTENANCE

PROPERTIES

- The tropical hardwood used for The Table / The Circle / The Bow is extremely durable and thus insensitive to mould.
- Every plank is carefully selected and checked for stains, cracks and sapwood.
- The wood will naturally age evenly without treatment.
- The wood does not need to be treated to retain its durability.
- Wood is a natural product and can start to crack due to further drying after installation.

TREATMENT

The wood of our tables is delivered untreated, it will turn grey over time. This process occurs evenly and, with regular maintenance, gives a beautiful result.

If this effect is not desired, you might want to treat the planks with a hardwood specific product. If you want to preserve the original color of the wood, the treatment should be done before it starts to grey.

Ask a specialist retailer about the possibilities.

The following products were tested by
Wünder and found to be good for treating
The Table:

1. RMC Hybrid Wood Protector from the Rubio Monocoat brand. Colour teak of pure. This product enhances the colour of the wood and stops ageing for about 1 to 2 years.

2. Deck care from the Horsemen brand. This product does not stain the wood but repels water, allowing the wood to age more evenly.

MAINTENANCE

Regularly cleaning the wood will preserve its original colour for longer.

- Use natural soap to remove grease stains from the wood. Leave the soap on for 15 minutes and clean with a soft brush. Always follow the direction of the wood grain. Then rinse the wood with water.
- Grease stains that are noticed immediately can be cleaned off with a damp cloth and washing-up liquid.
- Do not use aggressive detergents to clean the wood.
- Do not use a high-pressure cleaner to avoid damaging the wood fibers.
- The planks can be sanded down to give them back their original color. Beware that this can only be done a few times as a thin layer is removed from the surface at every sanding.
- If possible, cover the table during winter or place it underneath a roof.
